MyCRM

eSpell 2013

## eSpell for Microsoft Dynamics CRM 2013!

The eSpell solution for Microsoft Dynamics CRM 2013 from MyCRM provides additional functionality to the CRM platform by enabling Spell Checking of all field types that hold text.

Key Benefits:

1. Spell Check all text fields on CRM entities
2. Spell Check notes added to CRM
3. Spell Check saved notes
4. Spell Check the email activity text
5. Spell Check Knowledge Base articles

Easy to Use

eSpell is a fully integrated enhancement to Microsoft CRM and runs from a new button displayed on the CRM ribbon in the related entity.

eSpell 2013

You can run the spell checker functionality on most entities with text being taken from a field in focus, or with CRM 2013 the whole entities the text for errors.

After checking the correct text is returned to the field that was selected.

In CRM2013 the whole form can be checked in one go and using the inbuilt auto save values are corrected and updated in one go.

eSpell also enables the selection of different dictionaries supporting many languages which are downloaded and held in memory while checking is done.
